

Carbon Negative Network Northeast

Biochar Roundtable

Strategy & Planning

for a Carbon Negative Future

Confronting Climate Change

Saturday, March 14

New England Small Farm Institute

Jackson Road, Belchertown, MA

Four Roundtable Conversations on key development issues

- Technology & Equipment for New England Farms & Communities
- Biochar in Soils: Research Issues & Opportunities
- Vision & Strategy for Locally Integrated Food & Energy
- Petition to RGGI: Biochar Credit in a Carbon-accountable Economy

New Revolutionary CARBON-NEGATIVE Strategy

reverse climate change & reduce fossil fuel dependence

- Produce Renewable Biofuels
- Sequester Carbon in Soil
- Reduce Farm Chemical Use
- Create Sustainable Soil Fertility
- Grow Nutrient Dense Foods

A Roundtable is a circular conversation by three or more leaders in one area of concern. After presentation and discussion by experts, the listening audience is invited to contribute information and insight.
